VERSYS 650 FEATURES

TFT Colour Instrumentation with Smartphone Connectivity

The compact new 4.3” all-digital TFT colour instrumentation gives the cockpit a high-tech, highgrade appearance. The new meter also offers additional features unavailable on the previous model, including smartphone connectivity.

Latest Versys Family Styling

Redesigned upper cowl inspired by the Versys 1000 and a new windshield bring the Versys 650 in line with latest Versys family styling.

Slim, Upright Riding Position

Slim, upright position and wide handlebars offer a naturally relaxed posture and high controllability

KTRC (Kawasaki TRaction Control)

Kawasaki's advanced traction control system provides both enhanced sport riding performance and the peace of mind under certain conditions to negotiate low-traction surfaces with confidence. Two modes allow riders to adjust settings to suit the riding situation and rider preference.

USB Outlet (Accessory)

Complementing the accessory DC outlet, a new accessory USB outlet features dual-covers for high water resistance. Both power sources can be built into the cockpit's inner cover, where they would be ideally positioned for charging accessories or personal items.

649 cm3 Liquid-Cooled, 4-Stroke Parallel Twin

Optimised for gratifying response in everyday riding situations, the exciting 649 cm3 Parallel Twin engine offers smooth, linear response, strong low-mid range torque and favourable fuel economy.

Increased Wind Protection

Together with the redesigned upper cowl, a new windshield offers increased wind protection, contributing to greater rider comfort and adding to the Versys 650's potential as a capable touring partner. Its four positions can conveniently be adjusted from the rider's seat.

LED Lightning

Complementing its LED taillight, new LED headlights add symmetry to the Versys 650's "face." LED turn signals add a modern touch, contributing to the bike's good looks.
